Just like our elite athletes continuously finetune every detail in their training and performance, we constantly improve our garments and collections in order to boost the user's experience.

For this season we have upgraded the Run assortment to a 2.0 level, and we have also fully implemented the SubZ, Lumen and Hydro concepts into the Bike range. In addition, we are proud to present a major comeback in Baselayer in the form of the new Core Dry Active Comfort.

Furthermore, the Outerwear category has been enriched with the new Explore concept, which includes a comprehensive range of outdoor garments designed for the rapidly growing 'Light Outdoor' everyday adventures.

SEGMENTS

# For world champions and everyday heroes.

**Core** believes everyone's an athlete and provides a high level of functionality that makes it possible for all people to enjoy sports achievements. This is the starting point for our offer.

**Advanced** combines sport-specific features with exceptional functionality to support enthusiast athletes in their athletic progress.

**Pro** Featuring a supreme level of functionality and high-tech innovations, Pro targets professional athletes who demand nothing but the best in all aspects of their training and racing.

# Baselayer

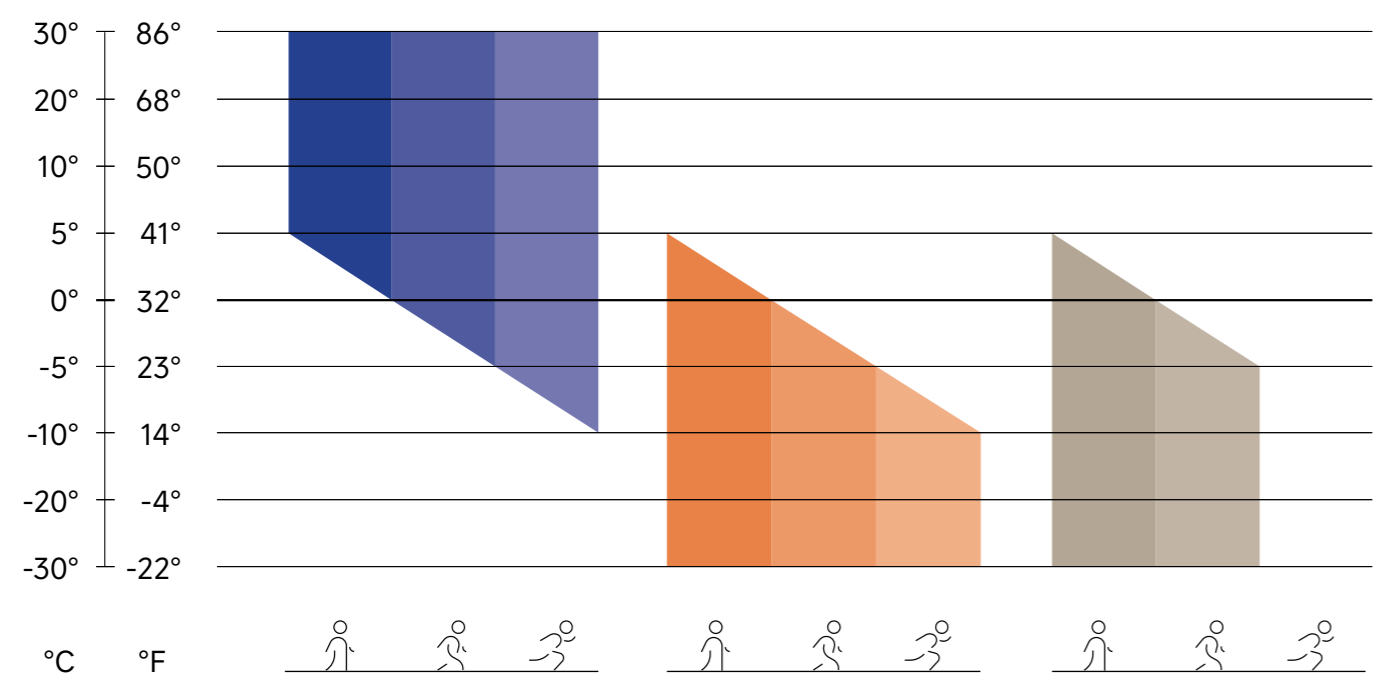

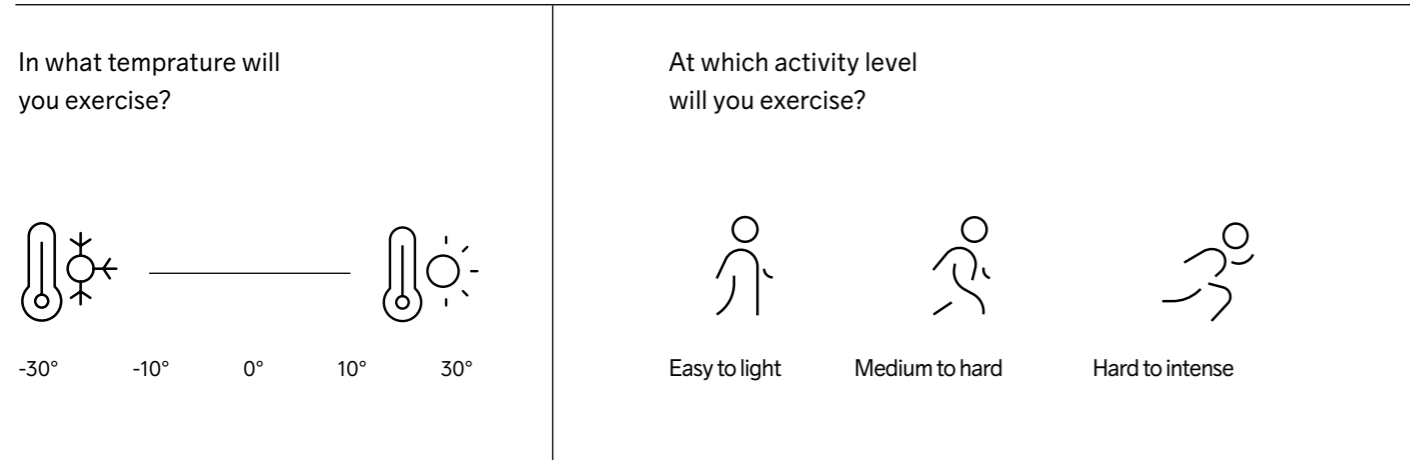

Craft is a pioneer in performance baselayer and offers functional garments that provide excellent body-temperature management during exercise in any condition.

The fabric structures and knitting techniques interact to efficiently transport moisture away from the skin and distribute it on the outside, where it evaporates or is passed on to next layer for optimal performance and comfort.

# Craft Temperature Control System

Dry is our super-efficient baselayers made from synthetic fibers that help you stay dry during intense workouts in warmer temperatures. Contrary to popular belief, a baselayer is always a good idea, even if the thermometer is showing red.

This is what you want if you plan on working out when it's cold. These baselayers are made of the best of best when it comes to synthetic fibers, keeping you both warm and dry, no matter if you're going for a new PB or just talking a walk in the park.

Wool. You either love it or hate it. This baselayer collection is based on natural fibers and keeps you warm in really cold conditions, even when wet. The garments are super versatile and work just as well for high-intensity training, especially since the material has odor-resistant qualities!

Developed together and for the worlds elite athletes. This is the best baselayers we have to offer.

Icons

Some products really stands the test of time. And through the years they have become true classics that you will always find in our range.

# Concepts

## Active Extreme X

Active Extreme X is a revived version of a baselayer icon and is the perfect choice for most kinds of high-intensity workouts. The items are made of lightweight SeaQual polyester yarns produced from recycled plastic waste from the ocean and come with a waffle-knitted design for excellent moisture transport and body-temperature management. A proven favorite amongst our elite athletes.

## Active Intensity

Active Intensity brims with passion and represents the latest in high-performance baselayer. The items are made of high-tech fabrics that combine with seamless design, body-mapped structures and athletic fit to ensure efficient body-temperature management. A perfect choice for high-intensity cross-country skiing, running and cycling.

## Active Comfort

Active Comfort is a crossover collection that makes a perfect choice for all kinds of activities, such as running, cycling and cross-country skiing as well as trekking, alpine skiing and relaxed après-ski. The soft and comfortable garments keep you dry and warm, and work both as a baselayer in colder conditions and as a single layer in milder temperatures.

## Fuseknit Intensity

Fuseknit Intensity baselayers are made of lightweight thermal yarn and come with hollow fibers and body-mapped climate zones that together provide excellent thermoregulation. In addition, the garment features the innovative Fuseknit technology, which combines seamlessly knit parts with ergonomic and strategic seams to create soft and supple garments. The result is fewer seams and a smooth, chafe-free experience. A great choice for alpine skiing and similar activities.

## Essential

Essential includes lightweight and breathable underwear with great moisture transport that provide excellent comfort during everyday workouts.

## Nanoweight

Nanoweight is a very lightweight baselayer concept with an innovative mesh construction that provides superior ventilation and cooling. The superlight mesh fabric has a structured surface that allows air-channels to form between the skin and the garment, enhancing ventilation even more. Thin recycled polyester and taped details ensure light and eco-friendly products.

## Wool Extreme X

Wool Extreme X is a wool-infused polyamide baselayer that offers cutting-edge body-temperature management during high-intensity workouts in cold winter conditions. The merino wool generates warmth even when wet while the polyamide rapidly propels moisture and excess heat from the skin to next layer. In addition, waffle-knit design provides insulating air channels and a soft touch against the skin. A perfect choice for intense cross-country skiing, winter running, winter cycling and similar activities.

## Merino

Merino baselayers are made of a soft merino wool and polyester blend that keeps you dry and warm all-day long. The combination of mulesing-free merino wool and functional polyester ensures excellent thermoregulation during low- to medium-intensity activities. In addition, the fabric's soft and fine fibers provide a smooth touch against the skin, making the garments a great choice for alpine skiing, trekking and hunting.

## Jerseys & Tees

999985

### Active Extreme X 1909688 Active Extreme X Wind LS W €70

Baselayer jersey with wind protection at front for racing and high-intensity workouts in cold and windy conditions. Recycled fabrics.

- Tight fit
- Thin, lightweight and elastic fabric that is channel-knitted to trap air and provide warmth.
- Coolmax-Air fiber against the skin enhances cooling and moisture transport.
- Flatlock seams that follow body movements
- Elastic windprotection panels at front body and shoulders
- This product is made with SeaQual polyester that is produced from recycled plastic from the ocean

**Size:** XS-XXL  
**Material:** 40% Polyester SeaQual 39% Polyester "Coolmax" 21% Polyester-recycled, Front body Face: 100% Polyester, Back 100% polyester membrane

999985

### Active Extreme X 1909687 Active Extreme X Wind SS W €60

Baselayer tee with wind protection at front for racing and high-intensity workouts in cold and windy conditions. Recycled fabrics.

- Tight fit
- Thin, lightweight and elastic fabric that is channel-knitted to trap air and provide warmth.
- Coolmax-Air fiber against the skin enhances cooling and moisture transport.
- Flatlock seams that follow body movements
- Elastic wind-protection panels at front body, shoulders and sleeves
- This product is made with SeaQual polyester that is produced from recycled plastic from the ocean

**Size:** XS-XXL  
**Material:** 40% Polyester SeaQual 39% Polyester "Coolmax" 21% Polyester-recycled, Front body Face: 100% Polyester, Back 100% polyester membrane

999000

### Active Extreme X 1909675 Active Extreme X ZIP LS W €65

High-performance half-zip jersey with tight fit and mesh panels for excellent function during high-intensity workouts. Recycled fabrics.

- Supertight fit
- Thin, lightweight and elastic fabric that is channel-knitted to trap air and provide warmth
- Coolmax-Air fiber against the skin enhances cooling and moisture transport
- Flatlock seams that follow body movements
- Mesh inserts at armpits for enhanced ventilation where it's most needed
- This product is made with SeaQual polyester that is produced from recycled plastic from the ocean

**Size:** XS-XXL  
**Material:** 40% Polyester SeaQual 39% Polyester "Coolmax" 21% Polyester-recycled

999000

### Active Extreme X 1909673 Active Extreme X CN LS W €55

Active Extreme X CN LS is a long-sleeve baselayer jersey designed for racing and high-intensity workouts in mild to cold winter conditions.

- Thin, lightweight and elastic fabric
- SEAQUAL™ polyester produced from recycled plastic
- Coolmax® Air Technology
- Waffle-knitted design for maximum moisture transport and comfort
- Mesh inserts at armpits for enhanced ventilation
- Flatlock seams that follow body movements
- Tight fit
- Moisture transport: 5 out of 5
- Activity level: 5 out of 5
- Temperature: -5°C to +10°C

**Size:** XS-XXL  
**Material:** 40% Polyester SeaQual 39% Polyester "Coolmax" 21% Polyester-recycled

# Nordic Ski

Focusing on performance and the outdoor experience, this fantastic activity gains new fans across the world at an ever-increasing speed. Another distinct feature of Nordic skiing is its unique expression – combining retro style with high function.

This is the cutting edge of cross-country skiing.

# Concepts

## CTM

Craft Tailored Motion. The most advanced fabrics and the latest innovations for the most demanding of cross-country skiers. When aerodynamics, superior body-temperature management and truly low weight is the name of your game, this is where you come to play. CTM level.

## Velocity

Velocity is a technically advanced concept for the competitive cross-country skier. High-performance 3-layer fabrics combine with perforated ventilation, glued seams, raw-cut edges and tight fit to create an all-out racing statement.

## Pursuit

Developed for ambitious skiers who ski with a purpose, Pursuit features highly functional fabrics and technically advanced details. Ergonomic fit ensures great freedom of movement while a street-inspired design provides a contemporary attitude.

## Storm

Storm is developed for enthusiasts who keep on skiing even when the wind blows fiercely across the tracks. Windprotective membrane at the front and brushed, elastic fabric at the back ensures excellent body-temperature management during low-intensity skiing in stormy weather. In addition, practical details and ergonomic fit provide a smooth experience.

## Glide

Glide is a thin, wind-protective concept designed for all kinds of winter activities. Bonded 3L softshell with plain tricot fabric on the inside ensures great weather protection and comfort. Adjust the level of insulation by layering up or down with thicker/thinner baselayers and/or midlayer items.

## Jackets & Vests

# Running

Craft Running is designed for runners who love to run, on any level. Combining highly functional fabrics and ergonomic design, these garments provide excellent body-temperature management, comfort, body-control and freedom of movement.

# Concepts

## Hydro

A lovechild of the epic Nordic rain and the eternal lust for running, Hydro opens up the fall season in a minimalistic yet colorful fashion. Featuring waterproof fronts and body-mapped taped seams, this concept turns any downpour into an uplifting experience.

## Lumen

In a place where the haunting darkness rule the day, light is an essential commodity. Drawing from this fact of Nordic life, Lumen comes with a glow-in-the-dark print that creates a uniquely stylish dazzle.

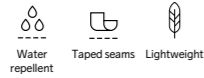

## SubZ

The sub-zero Nordic winters don't embrace with a gentle touch. No, they rather hit you right in the face. Born in this unforgiving land of frost, SubZ allows you to keep on performing even when the mercury collapses. Body-mapped padding and stylish cutting heat up the day.

# Footwear

Craft shoes focuses on the running experience, offering exceptional grip, anatomic shape and great energy return. Combined with an understated design, this is advanced simplicity for urban and rural terrain. For long and short distances. And for people who love to run.

# Concepts

## Ultra

Built for speed and durability, the Ultra concept includes ultra-lightweight and ultra-fast running shoes that are capable on varying surfaces. The platform provides a perfect balance between stack height, drop and foot angle to enable runners to keep form as effortlessly as possible, which is essential when you want to run fast during a sustained period of time. In addition, the chassis offers massive energy kick through stride and delivers enduring performance at distance. Developed in close collaboration with Tommy Rivs.

## Nordic

Nordic is an all-terrain running concept that provides protection and durability for rough off-road surfaces. Offering water resistance, durable protection, great cushioning and reliable traction, these running shoes are developed with all aspects of the Nordic elements in mind.

## OCR

OCR running shoes feature a perfect combination of all-terrain traction, lightweight flexibility and engineered support to conquer the most demanding obstacles courses in the world. This concept is also perfect for trail running in rough conditions.

## Indoor

The Indoor concept includes all-around indoor performance shoes that provide the best of stability, flexibility and reduced weight to give athletes the needed advantage on most types of indoor courts.

## VRUN

VRUN features anatomical toe shape, flexibility in the right areas and high energy return to deliver great performance in any condition everyday of the week. In addition, a high-performing Vibram Megagrip rubber outsole offers superior grip on both wet and dry surfaces and ensures that all the power in your stride is transformed into a forward movement. The result is faster, safer and more efficient running.

## X-series

X-series includes multipurpose running shoes built on a last design that truly follows the natural contours of the foot. Add great shock-absorption and explosive toe-off and brace yourself for an extraordinary versatile ride. In addition, innovative X cables run under the midfoot and behind the heel to secure and stabilize the foot with the least amount of structure possible – offering a perfect balance between support and flexibility for a natural stride.

# Bike

Whether you are a sunshine rider, a hard-core athlete who works out even when the rain pours down, or someone for whom the Sunday ride with the espresso break is sacred, Craft Bike is for you! Highly functional fabrics combined with ergonomic design ensure excellent weather protection, body-temperature management, body control, aerodynamics and comfort.

# Concepts

## Hydro

A lovechild of the epic Nordic rain and the lust for all-year-round high-intensity cycling, the Hydro concept turns any downpour into an uplifting ride. Functional fabrics, waterproof panels and body-mapped taped seams ensure great weather protection and excellent body-temperature management.

## Lumen

In a place where the haunting darkness rule the day, light is an essential commodity. Drawing from this fact of Nordic life, Lumen features glow-in-the-dark prints and reflective details to create a luminous expression during rides in low-light conditions.

## SubZ

The sub-zero Nordic winters don't embrace with a gentle touch. No, they rather hit you right in the face. Born in this unforgiving land of frost, SubZ allows you to keep on riding even when the mercury collapses. Thermal fabrics as well as bodymapped padding and lining ensure you stay warm and comfortable until spring arrives.

## CTM

Craft Tailored Motion. The most advanced fabrics and the latest innovations for the most demanding of riders. When aerodynamics, superior body-temperature management and truly low weight is the name of your game, this is where you come to play. CTM level.

## Essence

Essence is the sustainable choice that adds another green dimension to cycling. Recycled fabrics, solution dye and a clean, timeless design combine to make every ride an eco-friendlier experience. Mixes and matches perfectly with all your other cycling items.

# Infinity C1 pad.

The patented Foam Cutting Technology (F.C.T.) is our latest laser-cutting technology. Traditional construction would create a stiff step between the two different areas but by using the F.C.T. we can remove unnecessary material in specific areas in order to obtain optimal performance and comfort at the same time.

In order to create a perfect anatomical shape, the side wings and front cup come with a bended design. The front cup also has a debossed area that increases the space for the genitals, decreasing blood pressure and the sense of fatigue.

The new C1 design allow us to work on two separate parts of foams that are cut and shaved independently. This procedure reduces the waste of shaved foam with approximately 25-30%.

C1 is available in three sizes – XS/S, M/L, XL/XXL – with different densities in order to satisfy any rider's unique demands and needs. The main dimension of the pad is the same for all sizes but the construction foams have three different densities (pressure energy).

**DENSITY:**  
80/100/120 kg (depending on size)

**THICKNESS**  
**SEAT AND FRONT:** 14 mm  
**CENTRAL:** 8 mm  
**OUTER:** 4 mm

WOMEN MEN

# Infinity C2 pad.

INFINITY C2 comprises three layers, including a second and third layer made of medium-density and high-density foams. Together these two layers create a perfect combination that cushions and absorbs energy and then dissipate it like an anti-shock system. In addition, the layer closest to the skin is made of Italian top-quality polyester fabric that offers great 4-way stretch and excellent moisture transport. The fabric's 4-way elasticity allows the pad to follow the pedaling, moving body.

In order to create a perfect anatomical shape, the side wings and front cup come with a bended design. The front cup also has a debossed area that increases the space for the genitals, decreasing blood pressure and the sense of fatigue.

The new C2 design allow us to work on two separate parts of foams that are cut and shaved independently. This procedure reduces the waste of shaved foam with approximately 25-30%.

**DENSITY:**  
60-80 KG

**THICKNESS:**  
**SEAT AND FRONT:** 12 mm  
**CENTRAL:** 8-10 mm  
**SIDE:** 3 mm

WOMEN MEN

# Infinity C3 pad

The pad is made of recycled polyamide that offers all the comfort and features that comes with traditional high-quality polyamide. The yarn originates from flakes obtained by industrial waste that are fused into chips and then becomes fibers and finally yarns. The result is a high-performing material with a green attitude. In order to enhance breathability, the pad's first layer has a perforated design.

The pad's high-quality foam is laser cut to ensure optimal comfort, support and leg movement. Furthermore, the laser-cut technology also allows the pad's layers to be firmly attached to each other without losing flexibility.

The C3 now has a 3-dimensional shape with bended side wings to provide enhanced comfort during pedaling. The dimension is slightly bigger than the previous versions, offering larger contact area with the body. In addition, the new foam now has a higher density – 85 kg/m<sup>3</sup> – to ensure exceptional comfort during longer rides.

**DENSITY:**  
80 KG

**THICKNESS**  
**SEAT AND FRONT:** 12 mm  
**SIDE:** 3 mm

WOMEN MEN

# Infinity C4 pad

## Oeko-Tex® 100

The pad is made of Oeko-Tex® 100 fabrics and foams of the highest quality ensure durability and efficient moisture transport while perforated holes provide enhanced ventilation. Thanks to its well-designed sitting area, 4-way stretch, INFINITY C4 makes your ride a smooth experience.

INFINITY C4 pad features ergonomic shape and gender-specific design that offers excellent comfort for both the male and female anatomy. A 3-layer compound with high-density foam at the center and soft foam at the edges, the pad provides great support during any kind of ride.

**DENSITY:**  
35-80 KG

**THICKNESS**  
**SEAT AND FRONT:** 12 mm  
**SIDE:** 3 mm

WOMEN MEN

# Infinity C5 pad

INFINITY C5 is a soft, lightweight pad with 4-way stretch and minimal construction that offers good protection and great freedom of movement. Made of microfiber fabric and perforated foam that provide high breathability and quick drying, the pad is a perfect choice for high-intensity activities. Very soft surface fabric ensures a smooth touch while gender-specific design offers optimal comfort for both the male and female anatomy.

**DENSITY:**  
80 KG

**THICKNESS:**  
5mm

WOMEN    MEN

# Infinity C6 pad

INFINITY C6 is a lightweight pad that is used in underwear to offer a comfortable experience for commute riders. Made of Oeko-tex®-certified fabrics and foams of the highest quality and featuring multi-density layers and 4-way elasticity, the pad provides the right support for all body movements.

The pad's innovative and durable micro-polyamide fabric offers an extremely soft and silky touch. In addition, the unique fabric provides high shape retention, comfortable support and great moisture transport. Seamless, laser-cut and gender-specific design ensures optimal comfort for both the male and female anatomy.

**DENSITY:**  
60 KG

**THICKNESS**  
SEAT AND FRONT: 8 mm  
CENTRAL CHANNEL: 6 mm  
SIDE: 3 mm

# Accessories

In sports as in life, success is built on details. Small things, like comfortable socks, pre-shaped gloves, a warm hat, an ergonomic hydrate belt or weather-protective shoe covers, could make all the difference. Made of functional fabrics, these accessories elevate your sports experience and perfect your performance.

The Craft Principle

Don't break  
the chain.

# Craft Principle

Since 1977 we have been actively involved in the research and development of ventilation and moisture dispersal properties for different fabrics. The fruit of these efforts is the Craft Principle, our way of providing functional training and competition wear that ensures the best body micro-climate (the temperature and moisture conditions closest to the body) for optimal performance.

An intensive training session will result in the body producing a considerable amount of sweat. This is just how it should be and a confirmation that you are pushing your limits. If you are not wearing functional clothes, the sweat will remain in place and block the pores, causing your body heat to rise. Eventually the clothes will turn into a damp, cold and heavy "envelope", relentlessly hampering your performance.

If you are wearing functional clothes, however, the skin will stay dry and you will be able to perform at an ideal working temperature. Craft's functional clothes, in up to three layers, create a perfect microclimate and provide the basis for optimal performance. Each layer is equally important and complements the rest of the chain.

## Baselayer

Base layer that efficiently transports moisture away from the skin and distributes it on the outside of the garment, where it either evaporates or is passed on to the next layer. For optimal performance and comfort, Craft baselayer should always be worn underneath your outer layers, regardless of weather conditions.

## Midlayer

Craft midlayer provides insulation and warmth while transporting moisture and excess heat to the next layer or into the surrounding air. When the thermometer creeps downward, this layer enables you to retain valuable body heat without reducing your freedom of movement.

## Protection layer

The third and outermost layer is your shield against the elements and provides comfort and performance no matter the conditions. Transcending the laws of logic, craft protection layer protects against rain, wind and cold at the same time as it releases surplus heat and moisture from the layers underneath.

Hypervent®

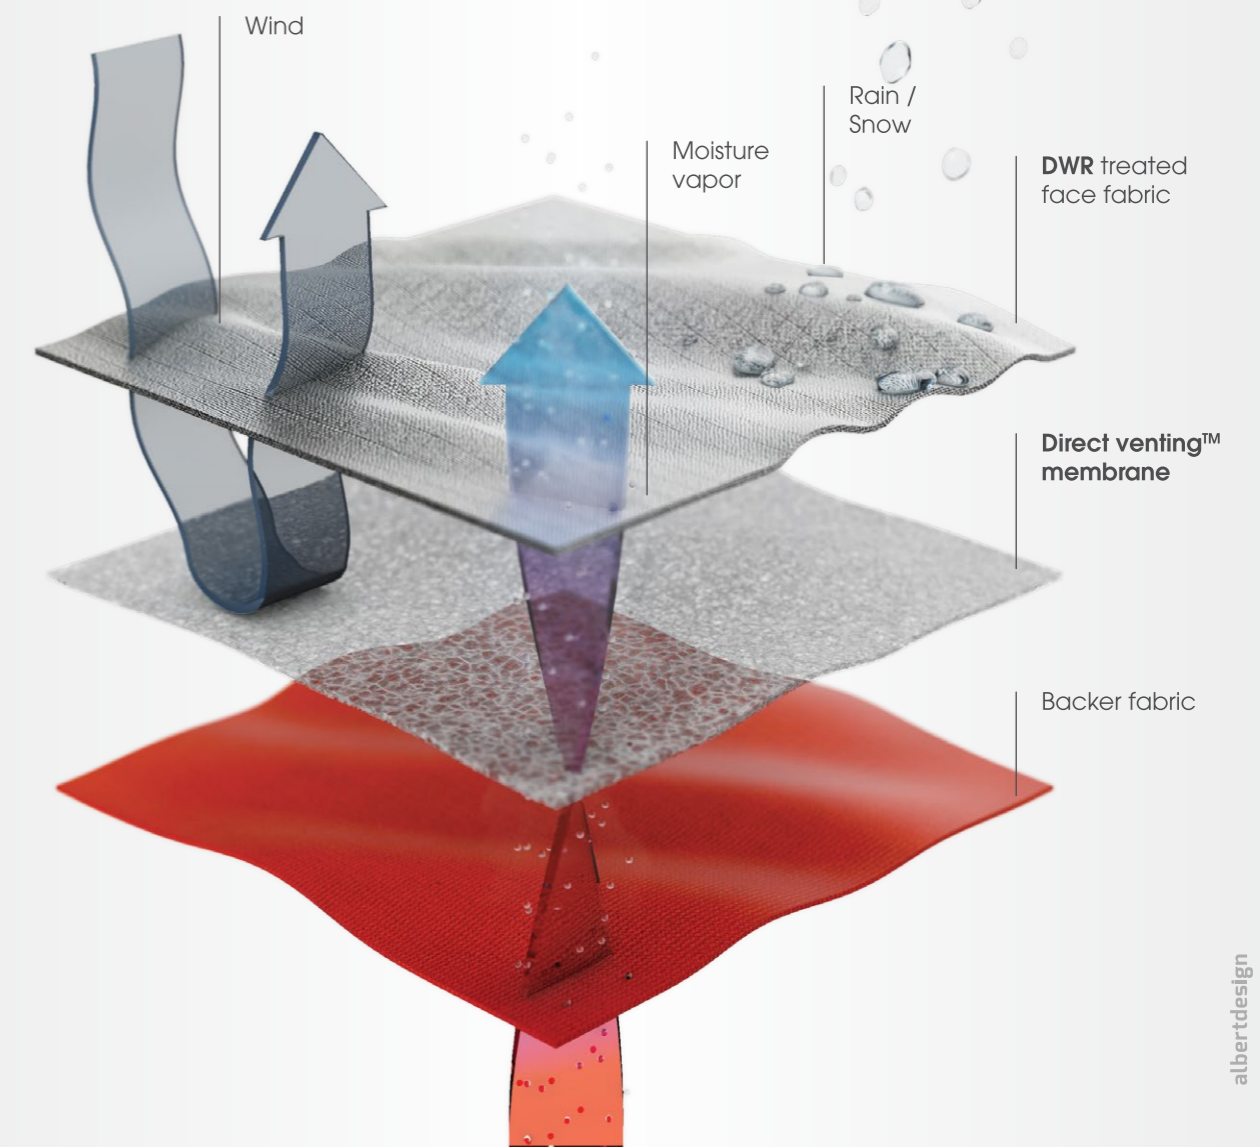

## ***HYPERVENT***®

Hypervent® is a hyper-lightweight and hyper-breathable pro-grade concept that elevates the performance for demanding athletes. Thin, supersoft and exceptionally lightweight fabrics, including a barely-there mesh, combine with bodymapped taped seams for superior function, ventilation and comfort during both high-speed and long-distance training in hot conditions.

## DValpine Shell Hoy Micro PL 3L

albertdesign

### PROTECTED AND DRY with eVent® DValpine

**eVent DValpine** is a technical fabric that became the breathable core of the best 100% waterproof rain jackets. Developed by **eVent Fabrics®**, it protects from rain till 20m water column, giving a 20,000 g/m<sup>2</sup> breathability index.

This is possible thanks to the Direct Venting™ technology: an unique PTFE membrane featuring billion microscopic pores, that unlike other common poliuretanic membranes doesn't need to get wet to start performing.

The continous microventilation allows your jacket to membrane that work instantly to vent water vapor (sweat) that builds up inside your apparel and footwear when you perform.

Discover more about the eVent technology, browse our websites!

FABRICS

# SEAQUAL™

The SEAQUAL™ Initiative challenges Plastic Pollution and helps to clean our oceans from marine litter, driving society towards circularity. The SEAQUAL™ Initiative is a unique collaborative model involving NGO's, Fishermen, Local Communities, Researchers, Scientists, Authorities and Private Stakeholders to clean the Ocean floor and surface, rivers and estuaries, beaches and coastline.

Collaborating with SEAQUAL™ gives us the benefits of helping to build a better future for all of us.

**Cleaning**

Clean the Oceans and all the marine environment: Ocean floor and surface, rivers and estuaries, beaches and coastline.

**Revaluing**

Revalue post-consumer waste lost in the environment upcycling Plastic into new beautiful 100% recycled products.

**Sustainability**

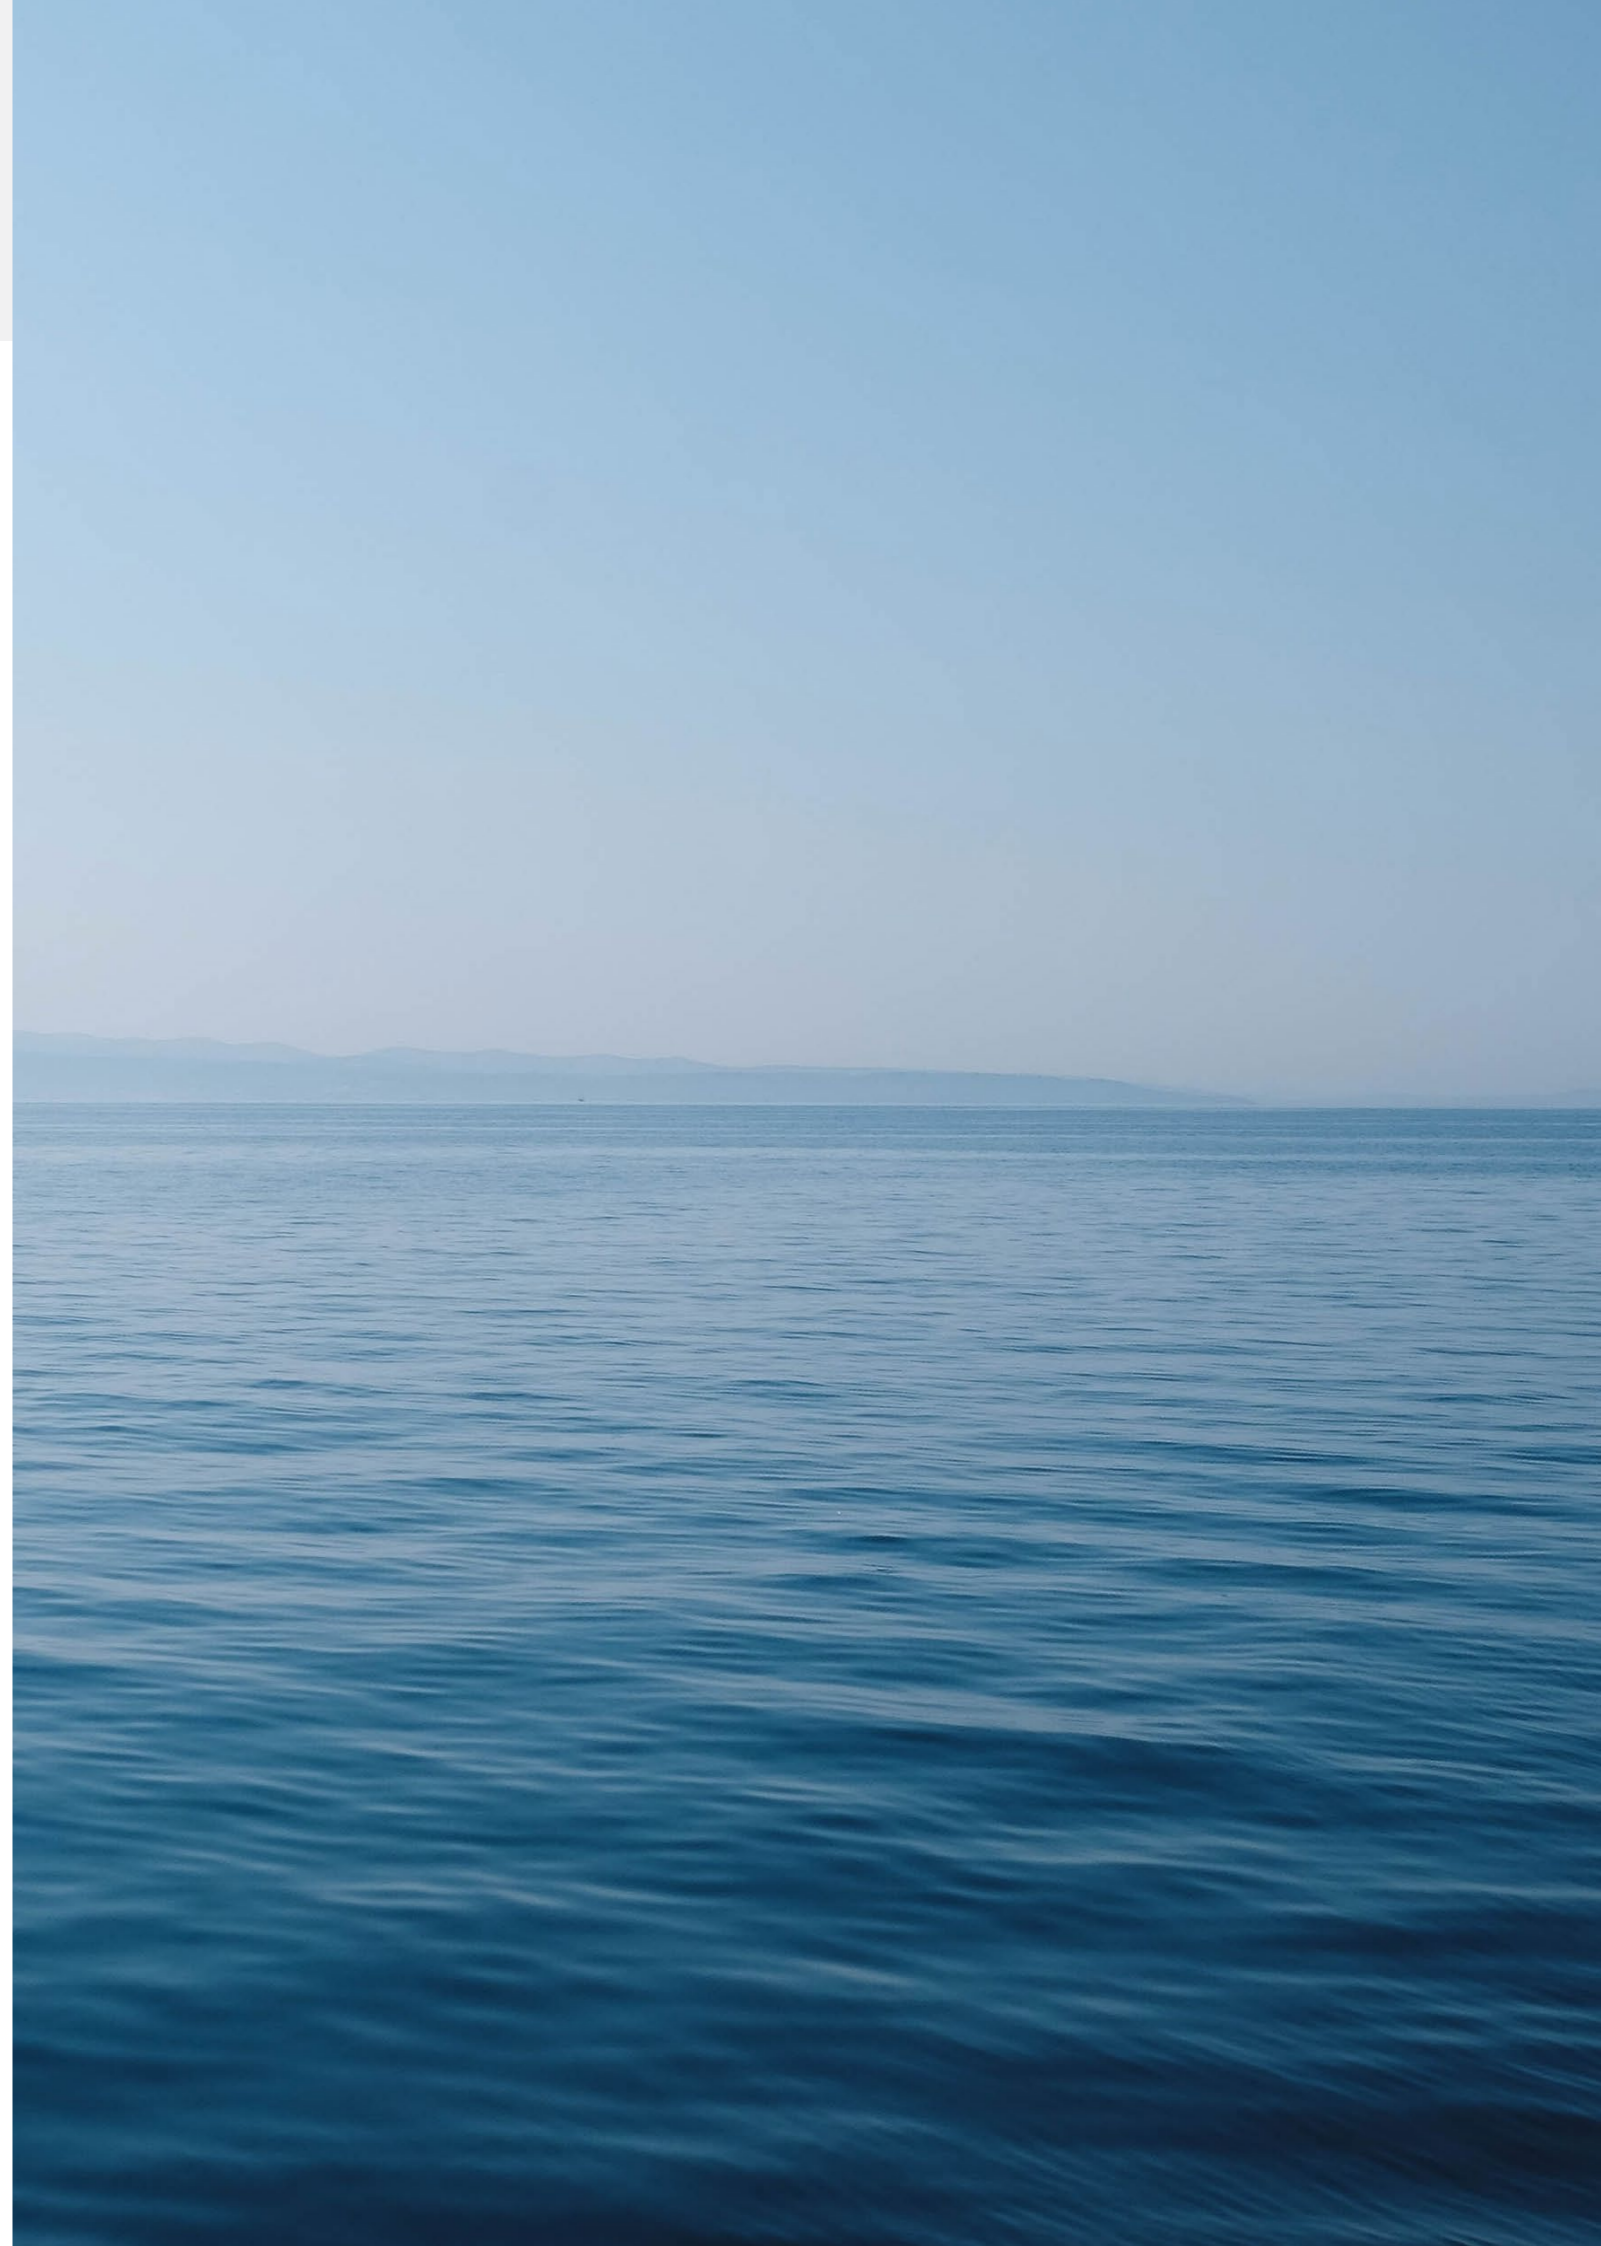

Drive local communities into a more sustainable way of living towards circularity, acting 'glocally': globally and locally.

**Supporting**

Support and engage with SEAQUAL™ Heroes and their stories (NGOs, fishermen, local communities and researchers).

**Development**

Develop beautiful everyday products containing Upcycled Marine Plastic, a 100% recycled material with full traceability.

# OEKO-TEX®

CONFIDENCE IN TEXTILES

STANDARD 100 by OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety.

If a textile article carries the STANDARD 100 label, you can be certain that every component of this article, i.e. every thread, button and other accessories, has been tested for harmful substances and that the article therefore is harmless in human ecological terms. The test is conducted by independent OEKO-TEX® partner institutes on the basis of an extensive OEKO-TEX® criteria catalog. In the test they take into account numerous regulated and non-regulated substances, which may be harmful to human health. In many cases the limit values for the STANDARD 100 go beyond national and international requirements. The criteria catalog is updated at least once a year and expanded with new scientific knowledge or statutory requirements.

Craft's STANDARD 100 by OEKO-TEX® label:

# VENTAIR™ X

VentAir® represents the latest in cutting-edge fabric systems. It's a highly advanced system that offers water and wind protection in combination with excellent ventilation and moisture transport. The system includes three fabric categories with unique characteristics for unique demands.

## VentAir®

Efficient ventilation and moisture transport with protection against wind and rain. VentAir® represents the latest in cutting-edge fabric systems. It's a highly advanced system that offers water and wind protection in combination with excellent ventilation and moisture transport. The system includes three fabric categories with unique characteristics for unique demands.

**Requirement:** WP > 8000  
MVP > 8000

## VentAir® Wind

Effective protection in windy conditions.

**Requirement:** AP > 35  
MVP > 8000

## Coolmax® All Season Technology

This high performance fabric contains COOLMAX® fibre, which helps transport moisture away from the body to the outer fabric layer, keeping you cool and dry during intense exercise in warm conditions.

Featuring channeled fibers with a large surface area, the fabric moves moisture away from the body rapidly when the athlete is hot.

In addition, the fabric also includes hollow fibers that offer lightweight insulation on colder days. This unique combination of different fiber designs provides overall comfort, keeping the wearer warm when it's cold and cool when it's hot.

The fabric's excellent thermo-buffering properties also help prevent post-exercise chill at the same time as it allows excess heat to dissipate into the air. The result is a fabric that keeps the users in their comfort zone regardless of temperature changes and activity levels.

## Coolmax® Air Technology

Garments made with COOLMAX® ALL SEASON technology are designed to optimise the body's natural temperature management in cold as well as warm conditions.

Featuring polyester fibers with a unique propeller-shaped cross-section, the fabric provides excellent thermoregulation for optimal performance.

Tests have shown that garments made with COOLMAX® Air technology offer superior body-temperature management and great comfort. In addition, COOLMAX® Air Technology also ensures a superb quick-dry effect.

# Active By Lycra® Technology

Designed to meet the unique performance needs of athletes and active people

Resulting from decades of LYCRA® fiber and fabric research, ACTIVE technology by LYCRA® brand is designed to meet the unique performance needs of athletes and active people. Fabrics deliver a range of stretch and recovery power to warp, circular, and seamless knit fabrics to help wearers perform their best while feeling comfortable.

# Power By Lycra® Technology

For the most high-intensity, high-energy sports.

POWER technology by LYCRA® brand combines high compression force with outstanding freedom of movement. Fabrics are specifically designed to meet the most demanding performance needs of athletes and active men and women. They meet INVISTA's highest performance standards for activewear. Whether for circular, warp, or seamless knits, POWER technology by LYCRA® brand combines high recovery power with excellent fit and freedom of movement for applications such as running and biking tights, triathlon suits, and base layers.

LYCRA® SPORT fabric is designed to support athletes during exercise. The fabric moves with the athlete in all directions and provides a perfect combination of low weight, efficient ventilation, muscle support, freedom of movement and comfort.

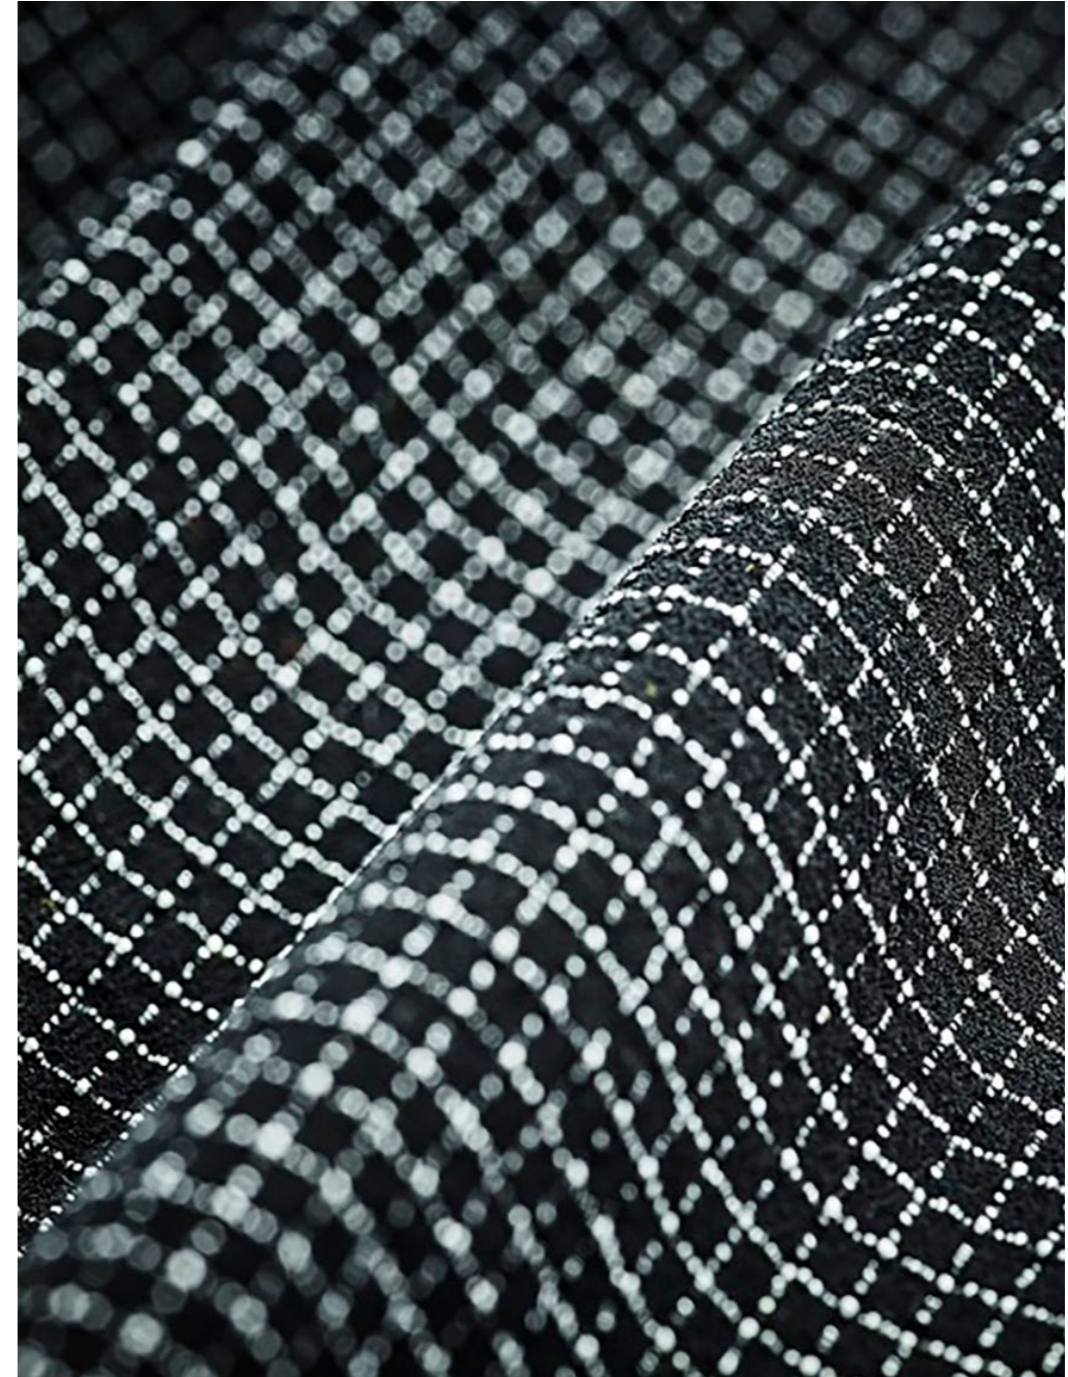

Dyneema® is a high-tech fabric used in crucial areas of bib shorts to reduce the risk of abrasion wounds during cycling crashes. The Dyneema® fiber is 15 times stronger than steel, floats on water and is soft as silk. As a result, the Dyneema® fiber prevents the fabric from complete rupturing at crash impact, protecting the skin and thereby reducing the risk of serious injuries. Preferred by riders in the World Tour peloton.

## Unique look with added performance

The key trend in apparel has been to reduce the weight of the garment but keep the extraordinary performance. From advanced explorers to nature enthusiasts, to the urban dwellers, the fabrics with Dyneema® fiber have been widely used in all-season garments, performing well in all weather conditions and packing small. They were an ideal solution for outerwear that requires a fabric that could be extremely light, yet withstand the rough handling fabrics, we opened the door to demonstrating an ideal material for a wide range of industries and fashion segments. The original look of the fabrics provides instant recognition, as it is connected to the premium quality of Dyneema® materials.

# Sizing & Measurement

Use the chart below to determine your size. If you're on the borderline between two sizes, order the smaller size for a tighter fit or the larger size for a looser fit. If your measurements for chest and waist correspond to two different suggested sizes, order the size indicated by your chest measurement.

## HOW TO MEASURE YOURSELF

**MEN**

**WOMEN**

**JUNIOR**

**A. CHEST**  
Wrap a tape measure evenly around the fullest part around the chest under your arms.

**B. WAIST**  
Wrap a measure tape around your natural waistline.

**C. SHOULDER AND SLEEVE LENGTH**  
Measure from the lowest part of the neck, over the tip of the shoulder and down the outside of the arm, past the elbow and to the wrist. Keep the arm slightly bent.

**D. SEAT**  
Standing with your feet together, measure around the fullest part of your hips.

**E. INSIDE OF LEG**  
Standing with your feet together, measure from the crotch all the way down to the floor. Don't forget to stand as straight as possible. You may have to ask a friend to help you.

**F. LENGTH**  
The total length of your body from foot up to the top of your head.

# International Footwear Size Chart

## HOW TO MEASURE YOUR FEET

### Step 1

Stand up straight on a hard surface with your heel against the wall and a piece of blank paper taped to the floor.

### Step 2

Have someone mark the longest part of your foot (referred to as heel-to-toe length) on the paper with a pen or pencil, or measure yourself if necessary. Repeat with the other foot, as sizes may be different on left and right foot.

### Step 3

Use a ruler to measure the heel-to-toe length you marked for each foot.

MEN			
UK	US	EU	Heel-to-Toe
6	7	39½	25
6½	7½	40	25,5
7	8	40¾	26
7½	8½	41½	26,5
8	9	42	27
8½	9½	43	27,5
9	10	43½	28
9½	10½	44	28,5
10	11	44½	29
10½	11½	45	29,5
11	12	45¾	30
11½	12½	46½	30,5
12	13	47	31
13	14	48½	32
14	15	49½	33
15	16	50½	34

WOMEN			
UK	US	EU	Heel-to-Toe
3	5	35½	22
3½	5½	36	22,5
4	6	37	23
4½	6½	37½	23,5
5	7	38	24
5½	7½	38¾	24,5
6	8	39½	25
6½	8½	40	25,5
7	9	40¾	26
7½	9½	41½	26,5
8	10	42	27
9	11	43½	28
